Contact Information	Applied Computer Science Student		E-mail: monshinawatra@gmail.com
	King Mongkut's University of Technology Thonburi (KMUTT)		Mobile: 061-449-3292
	Bangkok, Thailand		GitHub/LinkedIn: monshinawatra
Education	Year	Degree / Status	Institute/School
	Ongoing	B.Sc., Applied Computer Science	King Mongkut's University of Technology Thonburi
Petchra			
‡ Granted to high-potential students maintaining a GPAX of at least 3.40.			
AI LLM Highlight Achievements	• Super AI Engineer Season 4: Awarded 2 winning awards for Data Science with LLM and Signal Processing. (2024) • LLM Fine-Tuning Experience: Experienced in generating structured LLM datasets and fine-tuning specialized models such as OpenThai-GPT and Typhoon. • Super AI Engineer Season 4: Achieved Second Runner-up in Liver Lesion Detection hackathon; ranked in the top 20% average across all hackathons based on the Kaggle leaderboard. (2024)		
Game Development Projects	Agnetic (Independent Game Project)		
	• Designed and developed an original title independently starting from the 48-hour Game Maker Toolkit (GMTK) Game Jam 2021 competition. • Extended solo development for 5 months post-jam to refine mechanics, design system progression, balance gameplay, and prepare a complete standalone release version.		
	Gamify Habit Tracker (Web Application, System Design)		
	• Designed and built a task management application utilizing player psychology and **gamification theory** to incentivize consistent user engagement. • Built end-to-end mechanics using the MERN stack (Express.js, React, Node.js, MongoDB) during web programming coursework at KMUTT.		
	ACS-Home (Platform Rewards System)		
	• Co-developed a web application platform designed to help Applied Computer Science students contribute to development projects. • Engineered and structured a systematic logic flow for users to earn limited contextual rewards for their contributions. Tech Stack: Next.js, MongoDB, Node.js.		
Professional Experience	Looloo Technology, Thailand — Machine Learning Engineer (2021 – 2023)		
	• Worked part-time for one year while completing university studies, executing full data pipelines from collection to model evaluation. • Spearheaded the Universal Text Detector project, handling data engineering, pseudo-labeling, and model synthesis pipelines for print and handwritten documents. • Managed quality assurance workflows for the TH-EN Handwritten OCR project by systematically analyzing, tracking, and visualizing model error results.		
	AI-Builder Camp (2021)		
Other Computer Vision AI Projects	• Completed a highly selective 8-10 week deep tech AI camp mentored by Dr. Titipat Achakulvisut, establishing foundational skills in data preparation, testing, and model optimization.		
	Payment Extraction (Capstone Project)		
Speaker Experiences	• Engineered a multi-modal computer vision pipeline to systematically extract and clean data from complex retail menus and receipts. • Leveraged advanced frameworks including Grounded-SAM, CRAFT, TrOCR, and LLMs via structured prompt engineering. • Skills: Vision Transformers, Object Detection, Prompt Engineering, and OCR. • Developed real-time multiple object tracking pipelines utilizing **YOLOv8** and **CLIP-reID** frameworks for dense crowd environments (MU Biodat Lab Project).		
	Next to the Future: Monthly Seminar at KMUTT (2023)		
	• Acted as a presenter sharing insights on autonomous workflow generation with AI agents, delivering the topic: "Virtual Software Company with ChatDEV".		
Technical Skills	Project Presentations Coding Era at BACC (2022 – 2023)		
	• Presented technical papers and shared project lifecycles at the Bangkok Art and Culture Centre (BACC) representing AI-Builder.		
	Core Domains - AI Game Design, System/Reward Mechanics Design, Prompt Engineering, Computer Vision, DevOps		
	AI Prompting - Advanced PyTorch, LLM Dataset Generation, Hugging Face (Fine-tuning Typhoon OpenThai-GPT), Multi-modal Prompt Engineering, YOLOv8, Grounded-SAM, TrOCR		
	Development stacks - Next.js, React, Node.js, Express.js, MongoDB (MERN Stack), RESTful APIs		

Team Deployment Tools - Git version control, QA/Error Analysis Visualization, Bug tracking pipelines, L^AT_EX
